ABHINAV A

React Developer

abhinavdevofficial@gmail.com | 9746622189 | Kasaragod, Kerala

SKILLS

Programming Languages: JavaScript, HTML5, CSS3, TypeScript
Frameworks/Libraries: React.js, Redux, Zustand, Tailwind CSS, Ant Design, Framer Motion
Tools/Platforms: Git, GitHub, Visual Studio Code, RESTful APIs, Webpack
Version Control: Git, GitHub

EDUCATION

Tata Institute of Social Science

Bachelor of Vocational In Mechatronics Technologies

CGPA : 7.2

EXPERIENCE

React Developer | Metasoft IT Solution | Mangalore, India

March 2023 - Present

- Developed high-performance web applications using React.js and Redux, enhancing user experience and optimizing state management.
- Integrated RESTful APIs and optimized data fetching for seamless real-time updates.
- Utilized Redux and zustand for efficient state management, improving application performance and data consistency.
- Designed and developed reusable UI components, utilizing optimization technologies to reduce UI load time by 20%, enhancing user interaction and experience.
- Mentored Intern/Trainee developers through code reviews and pair programming, increasing team skill level and project velocity by 30%

PROJECTS

Bharat Auction - Online Bidding Platform

- Designed and developed an online auction platform using React and Zustand, enabling users to participate in live bidding for various products.
- Implemented Socket.IO for real-time updates, providing instant bid updates and auction status across all connected users.
- Implemented dynamic product category, subcategory, and form components in React, reducing future code rework by 60% and improving maintainability by enabling scalable additions and modifications without significant codebase changes
- Optimized image and content loading using lazy-loading techniques, which decreased load times by 25%.

Asset Glance - Asset Management ERP Solution

- Developed a comprehensive asset management ERP solution using React and Redux for better tracking and management of organizational assets.
- Reused components and optimized code for better maintainability and scalability across various user roles.
- Developed an interactive dashboard with React and Chart.js, boosting customer data visualization capabilities by 40%.
